

# Stone Lifters

## Stone Vac GSK3000 [3000kg]

The GSK3000 stone vacuum lifter is capable of lifting both vertical and horizontal stone units and features a stop start vacuum system to lift and manoeuvre concrete, stone slabs, steel plates and steel sections.

This stone lifter has the capacity to carry out flat lifts of up to 3000kg and vertical lifts of up to 2000kg, making this a very versatile machine for lifting sizable loads.

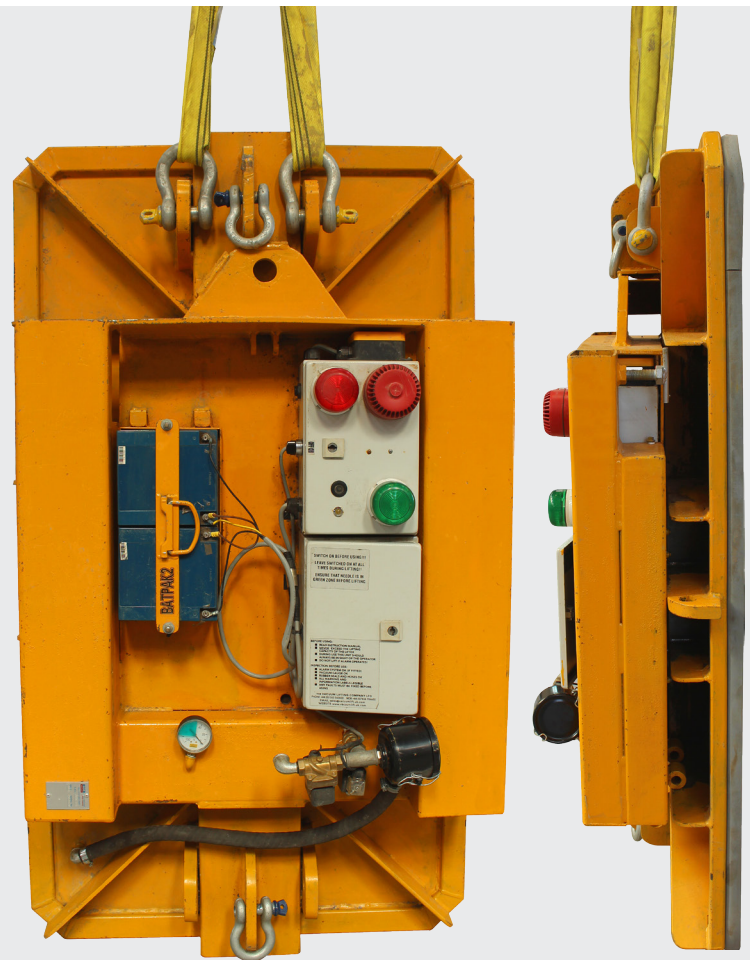

This model is powered by a rechargeable battery and features an audio-visual low vacuum warning that notifies the operator if there is any loss of vacuum on the system, allowing the load to be lowered to the ground and secured as necessary.

### Key Features

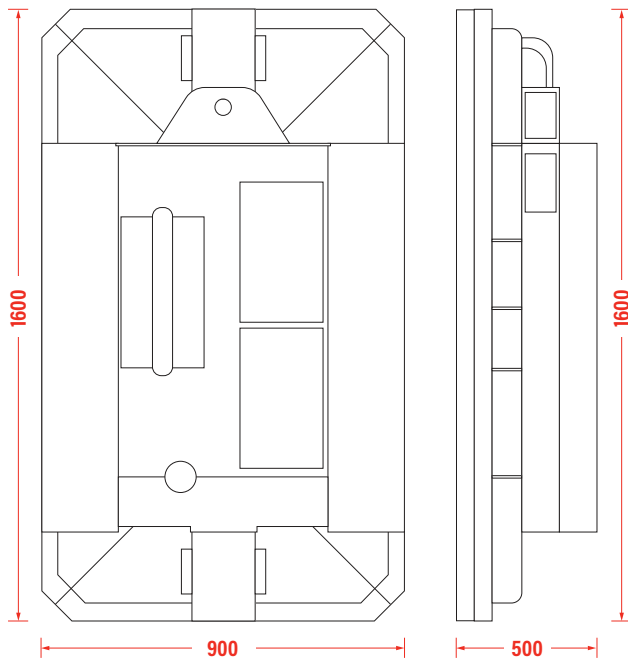

- 3000kg lifting capacity flat lift
- 2000kg capacity vertical lift
- Suction pad dimensions 1600 x 900mm
- Visual vacuum gauge
- Stop start single circuit vacuum system
- Low vacuum warning alarm and visual red indicator lamp
- We recommend using an SSD if lifting at height
- 24v battery with 110/240V charger
- Includes remote control
- Weight: 342kg

### Reference Code

VSL90

### Technical Data (mm)

Please Note: Before using the vacuum lifters on these pages we advise a sample of the material is tested by GGR Group.
