

# MultiGrab (750kg)

Brand New Robotic Attachment

- 750kg lifting capacity
- Full 360° rotation and vertical movement
- Can pick and place loads horizontally and vertically
- Ideal for overhead ceiling installations
- Cordless remote control
- Integrated safety system

The MultiGrab is a hydraulic lifting clamp that has been designed for use with mini spider cranes and is able to lift to a capacity of 750kg. This innovative clamp is the perfect option for picking, rotating and placing steel, pipe and ducting both horizontally and vertically.

The 360° rotation and vertical movement of the MultiGrab clamp allows loads to be picked up from the ground and placed for overhead ceiling installation. It is ideal for working in restricted or hard to reach areas thanks to its compact nature. The MultiGrab is controlled via a cordless remote and comes with an integrated safety system for optimum control and safe placement of loads at all times.
