

Trolleys

Glass Tow [400kg]

The Glass Tow can easily transport 400kg across 12 miles on a fully charged battery, making it ideal for moving glass A-frame stillages across large construction sites.

The Glass Tow can work on 10% gradients under a full load and comes with an easy-to-access finger control panel. Safety features includes a 'body-bump' safety device that backs up the truck should the control column come into contact with the operator's body.

Key Features

- Capacity: 400kg (must be evenly distributed)
- Dimensions: 1800mm (h) x 1000mm (w) x 2030mm (l)
- 280mm shelf width
- 520mm ground to shelf height
- 240V battery charger included
- Weight: 200kg
