Ultra-Tow [1000-4000kg]

The Ultra-Tow 1000 is a 4 wheel drive electric vehicle designed to easily transport goods across difficult ground such as sand or muddy terrain.

Equipped with two 800W motors, the Ultra-Tow has a towing capacity of 4000kg and can load up to 1000kg on flat ground.

The electromagnetic brakes maintain the tow on gradients of up to 30% when the machine is fully loaded.

Key Features

- Capacity: 1000kg (on flat surfaces)
- Towing capacity: 4000kg
- Maximum speed: 3 MPH
- 24V electric motor
- Two 800W motors
- External battery charger
- Electromagnetic brakes
- Emergency stop button
- Audio-visual low battery warning
- Weight: 351kg
- Box size: 400mm(h) x 900mm (w) x 1700mm (l)
