

Screw Grab [500kg]

The Screw Grab has been designed for the safe movement, and placement of dense stone and concrete around site, with a rubber lined jaw, and four-point lifting bail to ensure a stable centre of gravity, the Screw Grab can safely hold up to 500kg of rough or smooth stone within its self-locking jaws.

A side handle allows operators a steady fixed point to manoeuvre stones of up to 200mm wide around sites with ease and safety.

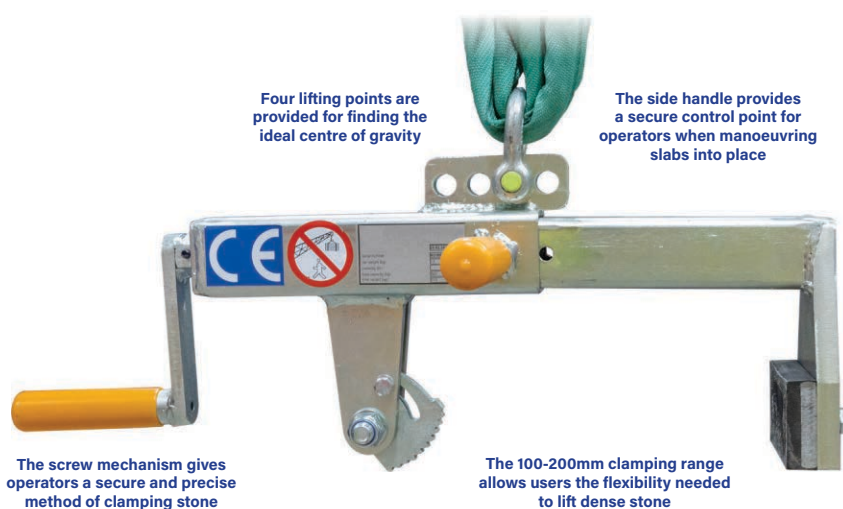

Weighing just 13kg and suitable for use below-the-hook with many of our gantry cranes, spider cranes, floor cranes and crawler cranes. This adaptable piece of equipment is perfect for working with stone masons, construction, landscaping projects, monuments, headstones and much more.

Key Features

- Capacity: 500kg
- Dimensions: 615mm (l) x 100mm (d) x 265mm (h)
- Made from high-strength steel
- Uses screw mechanism to clamp
- 1 x replaceable rubber-lined jaw
- 1 x serrated jaw
- Clamp range from 100-200mm
- Weight: 13kg

Reference Code

MSL46

One jaw is serrated to aid in holding onto rough stone, including half planed, grooved, chisselled and bush hammered finishes.

The other jaw is lined with a replaceable rubber pad to ensure the grip on the stone being lifted is secure.
