## The Sheetstand™ [700kg]

Made from recycled plastic The Sheetstand™ has a durable and practical design which can replace or complement your regular sheet goods racking system. With a load capacity of up to 700kg The Sheetstand™ can support glazing, sheet metal, plasterboards, stone panels and much more.

The Sheetstand™ can stand alone but can also be used in tandem with its linking function which increases stability or doubles the storage capacity if linked back-to-back.

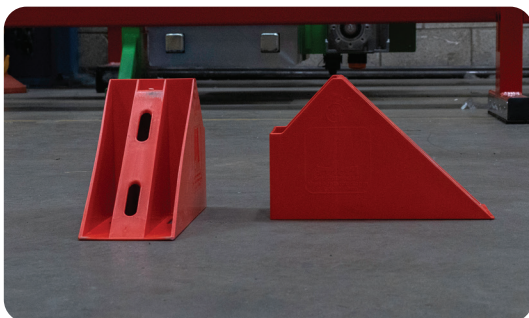

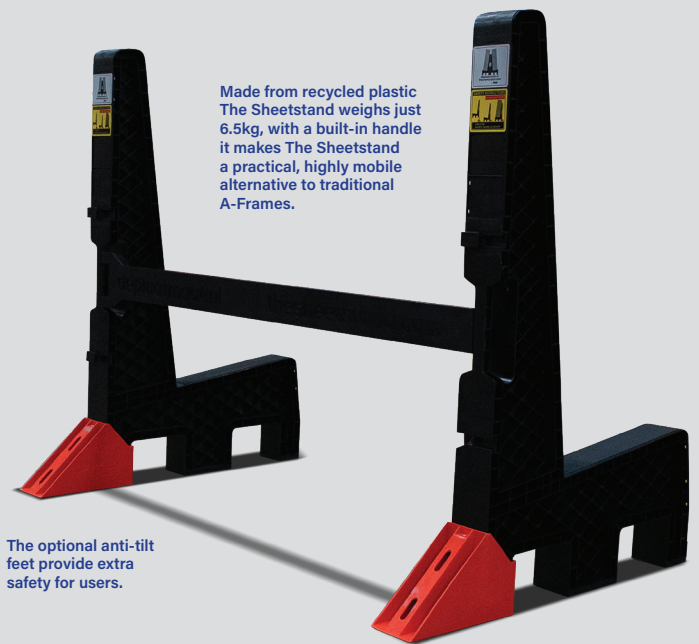

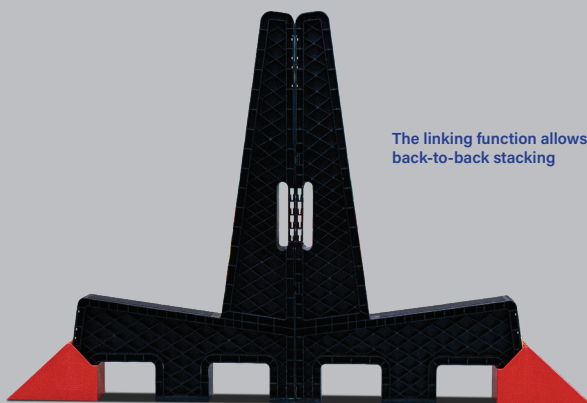

Transport and storage are also made practical with a built-in ergonomic handle for easy lifting, its stackable design, and weather-resistant material which is protected against moisture and decay.

### Key Features

- 700kg capacity
- Optional inline connector
- Optional anti-tilt feet
- Made from recycled plastic
- Can be used individually or back-to-back
- Weight: 6.5kg (each stand)

### Reference Code

AGT51

The optional anti-tilt feet gives extra stability to The Sheetstand for extra safety when on-site.

The inline connector is a cross connection that goes between two stands to increase lateral stability.
