

Stone Lifters

Stone Vac GSK1147 [1147kg/765kg]

One of our newest stone vacuum lifters, the Stone Vac GSK1147, can raise up to either 765kg (side lift) or 1147 kg (top lift) of stone panels, blocks, bricks, pavers, and kerbs.

With its continuously operating vacuum system, the Stone Vac GSK1147 is capable of lifting a wide range of stone materials in both vertical and horizontal orientations, including polished granite, marble, and porous limestone.

This below-the-hook stone vacuum lifter runs on a rechargeable battery, so there are no cumbersome cords to contend with.

Key Features

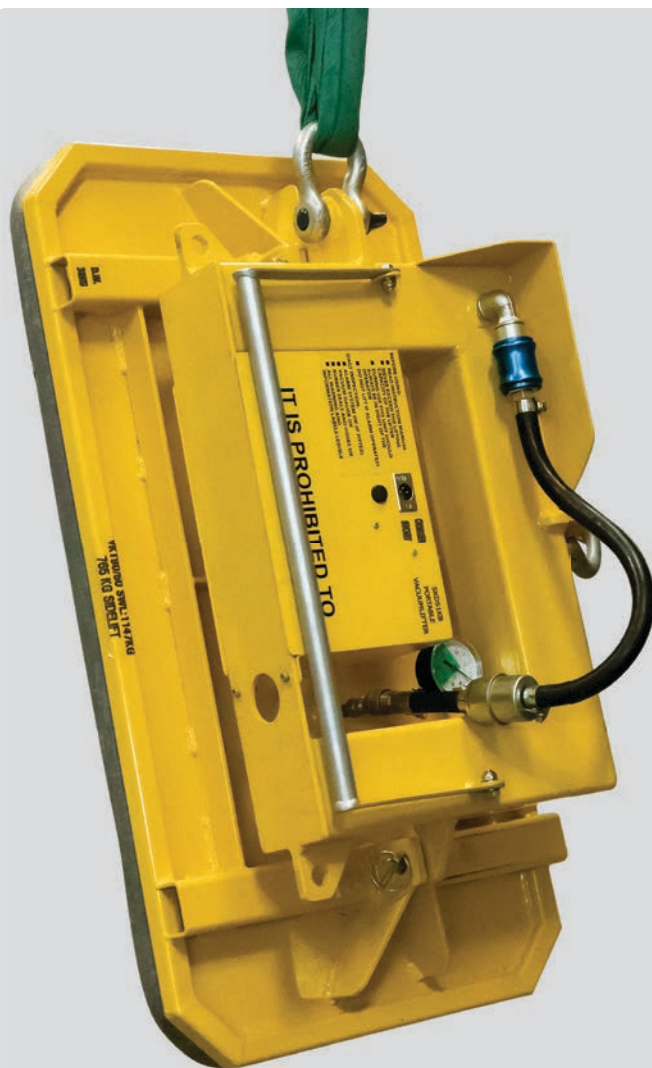

- Capacity: 765-1147kg (depending on lifting point)
- Constant running single circuit vacuum system
- 12v battery with 240V charger
- Audio-visual low vacuum warning
