

Cladding Lifters

Lift & Install Smooth &

CL-W Cladding Lifter [375kg]

The CL-W is a cladding vacuum lifter designed especially for lifting and installing cladding panels weighing up to 375kg.

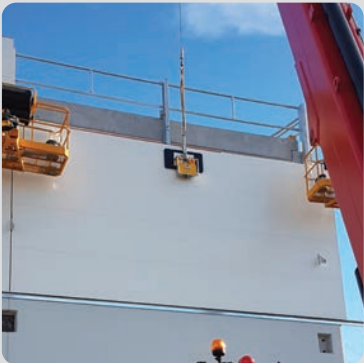

Panels can be safely manoeuvred from horizontal to vertical - a movement typically required for wall panel installation thanks to the manual 90° tilt and can be configured to lift vertical or horizontal wall panels with the manual 90° rotate function.

The pad on the CL-W works well with smooth or micro-ribbed panels that are used to build cold rooms, sheds, warehouses, and other cladding installation applications. The CL-W also allows you to reduce the height below-the-hook by utilising the detachable extended arm.

Fully powered by rechargeable batteries, each circuit on the dual vacuum circuit system has a coloured scale gauge attached that enables continuous monitoring of the vacuum level.

There is also included a dust and condensate filtration system that can be cleaned quickly and simply.

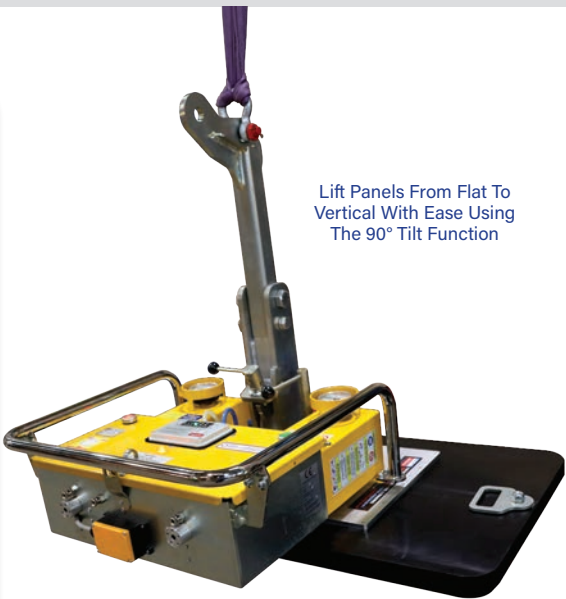

The CL-W can be manually operated or controlled via radio remote control, an optional transport trolley allows for easy and safe storage/transport of the machine. It also comes with a durable accessories suitcase for storing spare batteries, charger and the optional radio remote control.

Reference Code
VCL13

Technical Specifications

Safe working load	capacity:	375kg
Number of suction cups	cups:	4 within 1 1000x500mm pad
Suction cup	description:	closed cell foam seal
	approx dimensions:	1000 x 500mm
Suitable for lifting	materials:	composite sandwich panels, (PUR, EPS, mineral wool). other materials possible, subject to testing. airtight, non-porous and not covered by protective film.
Weight of lifter	approx:	65kg
Tilt	tilt:	90° manual
Rotate	rotate:	90° manual
Vacuum system	dual circuit:	1 pump, 2 vacuum reserve tanks
Voltage	pump:	12v DC from rechargeable battery
	battery charger:	110v/240v 50/60Hz single phase factory selectable
Standard accessories	standard:	audio-visual low vacuum warning devices, vacuum filter, 240v battery charger, spare battery, detachable extension arm, accessories suitcase, secondary safety straps, transport trolley
Optional accessories	optional:	additional alarm, radio remote control
