

Technical Specification Sheet

Compact Window & Plate Glass Trolley 496 ^[AGT31]

The Compact Window & Plate Glass Trolley is a short and sturdy version of our standard Window & Plate Glass Trolley 496, designed for the safer movement of smaller glass units.

Retaining all the benefits of our standard version, this mini trolley can easily transport glazing and fenestration units up to 40mm thick and 1000-3000mm in length. The chassis steers from each end for tight manoeuvring and its shorter frame makes this a more compact and lightweight glass transport solution.

Features

- 700kg capacity
- Weight of trolley: 36kg
- 40mm maximum sheet thickness
- Dimensions: 1950mm (h) x 1200-1500mm (w) x 500mm (d)
- Glass edge clearance / height off ground: 100mm
- For hire only
- Vacuum cups to be applied to clean, dry, non porous material
- This is not a lifting device - vacuum cups to provide stability in glass transit
